## Connelly Security **Complete**

The Connelly Security Complete is a compact and fully-integrated professional-grade wireless security and personal safety solution. Especially designed for residential and small office customers, many of whom are disconnecting from the standard PSTN network, it packs the full range of communication, configuration, and expansion options into a single, all-in-one modular wireless panel. The internal communications modules cost effectively deliver advanced GSM/GPRS and IP capabilities.

This comprehensive array of advanced features, together with its ease-of-use and rapid installation, make PowerMaxComplete the most cost-effective and modular security solution in the industry today.

- All-in-one, self-contained system
- Versatile internal communications options
- Highly robust and reliable architecture with full international certifications
- Modular and flexible design - affordable and easily adjusted to fit varying needs
- Simple to use, install and program
- Extensive range of accessories and expandability options

Security** 

### Enhanced, versatile communications capabilities

- Built-in PSTN communicator
- Easy-to-add internal communications modules (field-upgradeable) for GSM, GPRS and/or IP<sup>+</sup> reporting channels:
  - Enables highly reliable alarm reporting to the central station
  - Provides back-up for standard PSTN lines
- Two-way RF system with diversity antenna - facilitates highly reliable radio communication

### Flexible configuration options

- Optional proximity reader for easy and rapid arming and disarming using only a small tag and with no need for a keyfob
- Choice of external or internal transformer
- Voice functionality options - including two-way voice communication, voice prompts and family message center
- Partitions version available (up to 4)
- Expander module - including one PGM output, two additional hardwired zones, one wired siren output, and Speech Box interface

### Ease of Use and Reliability

- Simple to operate with wireless remote keyfobs to set and unset.
- Portable keyfobs also include integrated emergency buttons.
- Integrated Dialler that can signal to your mobile phone to inform you of alarm events.\*\*
- Allows quick installation without any mess or unsightly wires.
- Insurance Approved to EN50131-1 Grade 2.
- Modern and stylish design.

<sup>+</sup> Comes complete with two motion detectors (can be pet tolerant), one magnetic door contact, two remote keyfobs with integrated emergency buttons and external siren. Price applies to standard installations only.

<sup>\*\*</sup> Requires connection to a working phone line and may incur call charges.
